ABOUT US

GGL institute is an institution for computer education, Technology, Research and Business evidenced by its application of modern technology to teaching, research and community service and its provision of practical solutions to social, cultural, and economic problems. It has remained resilient in the acquisition and dissemination of ICT-driven skills to students anywhere in Africa. Locating in the Annang heartland where skill acquisition and entrepreneurship constitute the culture of the people. GGL Institute academic plan is structured to act as the backbone in the realization of the entrepreneurship/skill acquisition programme.

MISSION

Our mission is to create a truly modern experience by developing and disseminating universal ICT Knowledge for the benefit of all society. Much of this is achieved by publishing academic research of modern standard and by specializing in innovation research both locally and globally.

VISION

To be a centre of academic excellence by utilizing the available human and technological resources for teaching, research, community service and sustainable development.
